It's made in the USA!

Our Made in the USA stamp of approval is our promise to you that we will only use pure maple syrup produced in the United States of America. We are a small family company and believe in the value of "keeping it local". 70% of the world's pure maple syrup is made in Canada and a lot of that syrup is sold here in the United States. We cannot always produce enough maple syrup in our own woods, but any extra syrup that we purchase comes from other discerning American family producers. We encourage and support agriculture in America and especially the fine art of making pure maple syrup.

Over the past 80 years our family has nurtured many relationships with other wonderful families that share a passion and love for producing "only the best" pure maple syrup. We help supply these families with the tools and knowledge needed to make pure maple syrup. Then when we need more syrup than we can produce in our own woods, we only have to look to these wonderful families. We work on a simple handshake and the knowledge that if we treat each other fairly all involved will be rewarded.
